English

Willing to learn any Language

• In charge of coordinating/supporting multiple teams tasked with the development and administration of a defensive cyber operation (DCO) detection suite utilizing the Elastic, Logstash, Kibana (ELK) stack as well as various tools for data handling and display

• Responsible for the design, deployment, and maintenance of mirrored virtual network environments

• Tasked with automation utilizing scripting in bash and python while leveraging ansible playbooks

• Administering Docker client-server architecture while prepping for migration towards Kubernetes (K8s)

CEO | 2020 – Present

DroneBro Studios

• Chief Executive Officer managing daily operations and vision of a drone services company serving the real estate, industrial, and media industries.

• Maintain all required documents for operation under FAA guidelines, local laws, and federal/state mandated business outlines.

• Ensure customer satisfaction, oversee marketing operations, and spearhead continual process improvements in all business processes.

Cybersecurity Engineer | 2020 – 2021

Kratos Defense & Security – USAF, CCS-C

• Cybersecurity Engineer satisfying RMF requirements per NIST 800-53 across multiple programs to maintain and ensure ATOs within eMASS. Maintain, troubleshoot, configure, and deploy various network security tools, operating systems, and software technologies.

• STIG multiple systems/tools under various environments and scan for compliance while generating status reports for risk compliance.

• Automation through bash, VBA, powershell, and scripted SIEM deployments to ease the workload across a short-staffed team.

Network Security Engineer | 2020 – 2020

Defense Information Systems Agency

- Network Security Engineer that evaluates system network requirements to make appropriate technical recommendations.

- Establishes remote management connectivity, OS updates, Bit Error Rate test coordination, alarm profile configuration, and testing of the various layers of the OSI model.

- Monitors network performance to support deployments and ensures conformity with IA requirements

Cybersecurity Analyst | 2018 – 2019

Alpine Security

- Cybersecurity Analyst that conducted phishing campaigns utilizing automated command-line and graphical Linux-based tools. Organized results into vulnerability overview reports for clients while recommending remediation actions.

- Maintained hardware and patched software ensuring proper hardware performance and up-to-date software.

- Secured and monitored networks through automation and scripting.

Network Engineer | 2016 – Present

United States Air Force – Active Duty/Reservist

- Network Engineer that led small teams, worked logistics of material acquisition, and conveyed project updates to senior leadership.

- Regularly maintained data trunks in support of 6 Major Commands, 30 local tenant units, and 6000+ customers spanning 100+ DoD installations utilizing a \$150M Cisco/Ciena based network infrastructure.

- Monitored and counteracted alarm situations with methodical and decisive fix actions employing network management software to track irregularities.

MIG/GMAW Certified Welder/Fabricator | 2015 – 2016

Vermeer

- Fabricated Vermeer Terrain Leveler surface excavation machines (SEM's) and pile drivers such as the PD10 using a variety of fitting, burning, and welding processes.

- Inspected all work meticulously for defects, dimensions, alignment, and end preparations. Then reported and corrected

alignments, and QA preparations. Monitored and corrected discrepancies in order to sustain quality assurance standards.

- Operated and maintained cutting torch, plasma cutter, band saw, industrial Miller MIG welder, 10 ton hoists, and a wide variety of power hand tools. Upheld and reinforced standards and procedures outlined in Occupational Safety and Health regulations

Inventory Control Supervisor | 2014 – 2015

Walmart

- Conducted and supervised training of personnel on inventory control procedures and policies.
- Responsible for 4 million in product and stock.
- Enjoyed maintaining ultimate physical form whilst powering through hours of intensive stock unloading, analysis, and maintenance.
